SUMMARY

Dedicated Computer Science Engineering student specializing in Cybersecurity at SRM Institute of Science and Technology, with an 8.35/10 CGPA and hands-on experience across software development, AI/ML, computer vision, cybersecurity, backend development, web development, and databases. Experienced in developing real-time face recognition systems, sensitive-data security tools, database applications, and smart tourism solutions. Completed internships in frontend development and software development with exposure to AI/ML and security analysis. Strong interpersonal and teamwork skills, with experience in hackathons, event coordination, hospitality, logistics, and community volunteering.

EDUCATION

SRM Institute of Science and Technology

B.Tech – Computer Science Engineering, Specialization in Cybersecurity

Chennai, Tamil Nadu

2024 – 2028 | CGPA: 8.35/10

EXPERIENCE

Frontend Developer Intern

Duration: 1 Month

Zing Bizz

- Contributed to web development and frontend implementation for company projects.
- Developed and refined web interfaces using HTML, CSS, and JavaScript.
- Worked with team members to implement functional and user-focused web components.
- Gained practical experience working within a company development environment and collaborating on web-based solutions.

Software Developer Intern

Duration: 1 Month

LAMS Automation

- Worked across AI/ML, software development, and cybersecurity/security analysis activities.
- Contributed to technical development and integration based on project requirements.
- Applied programming and analytical skills to software and security-related workflows.
- Gained practical exposure to combining software development with AI/ML and security concepts.

PROJECTS

FaceRecognitionAI — AI-Powered Real-Time Automatic Attendance System | Python | OpenCV | YOLO11 | RetinaFace | ArcFace | FAISS | ByteTrack | PyTorch | FastAPI | Streamlit | Docker

- Developing a real-time AI-powered attendance system that automatically identifies students through live camera feeds and records verified attendance.
- Integrated YOLO11 for person detection, ByteTrack for multi-person tracking, RetinaFace for face detection, and ArcFace for face recognition.
- Implemented 512-dimensional face embeddings and FAISS-based similarity search for efficient face matching.
- Integrated face-quality assessment, liveness detection, unknown-face handling, and an AMFR decision engine combining recognition, quality, liveness, and tracking signals.
- Developed dashboard and backend components using Streamlit, FastAPI, SQLAlchemy, and database persistence.
- Added Docker/Docker Compose support for deployment and system integration.
- Development benchmarks include approximately 29 FPS camera capture, 19–20 FPS live display, and 2.5–3 FPS CPU-based AI inference.

- Tested FAISS vector-search scalability using synthetic datasets containing up to 500K 512-dimensional embeddings.
- Current project is under development with a target of approximately 95% recognition accuracy following formal dataset-based evaluation.

SecureClip — Sensitive Data Clipboard Monitor | Python | Tkinter/CustomTkinter | Regex | Pyperclip | SQLite

- Developed a real-time clipboard monitoring system designed to detect potentially sensitive information copied to a user's clipboard.
- Implemented Regex-based pattern matching to identify sensitive information such as passwords, email addresses, phone numbers, payment-card patterns, and identification data.
- Added risk classification and security alerts to notify users when potentially sensitive information is detected.
- Implemented automatic clipboard clearing to reduce the risk of accidental exposure.
- Designed the system as a lightweight Data Loss Prevention (DLP) solution rather than a conventional clipboard-history application.
- The current version does not directly implement encryption; encryption of stored or transmitted sensitive data is identified as a future enhancement.

Smart Tourist — Nilgiris District Police | Technology & Public Safety Project

- Contributed to a smart tourism and public-safety project developed in collaboration with the Nilgiris District Police.
- Participated in the development and integration of technology-driven components aimed at improving tourist support, safety, monitoring, and information accessibility.
- Worked collaboratively with the project team to translate requirements into technical solutions.

House Rental Management System | MySQL | SQL | Database Management

- Developed a database-driven house rental management system using MySQL.
- Designed relational database structures for property and tenant information.
- Implemented SQL operations for storing, retrieving, updating, and managing rental-related information.
- Applied database concepts including structured data organization and query-based information management.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, HTML, CSS

Web & Backend Development: HTML, CSS, JavaScript, Node.js, FastAPI, Streamlit

AI/ML & Computer Vision: CNN, YOLO11, RetinaFace, ArcFace, FAISS, ByteTrack, OpenCV, PyTorch, ONNX Runtime

Databases: MySQL, Oracle, SQLite, PostgreSQL

Cybersecurity & Networking: Linux, Wireshark, Cisco Packet Tracer, Regex, Security Analysis

Development & Tools: Git, GitHub, VS Code, Docker, Docker Compose, Redis, SQLAlchemy

CERTIFICATIONS

NPTEL — Design Thinking / Design Analysis

Cisco — Cisco Packet Tracer

Coursera — Introduction to Encryption

Udemy — Artificial Intelligence

HACKATHONS & COMPETITIONS

Smart India Hackathon (SIH) 2026 — Role: Backend & Data Developer - Contributed to backend development, data handling, and technical implementation as part of the hackathon team. - Collaborated with team members to develop and present a technology-based solution within a competitive time-constrained environment.

College Internal Hackathon — Achievement: Top 10 Team - Collaborated with a team to develop and present a technical solution during the college-level internal hackathon. - Contributed to technical implementation and problem-solving under time constraints.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

NIC Club — SRM Hospitality Head | Logistics Team Member | Event Coordinator - Served in multiple event-management responsibilities involving hospitality, logistics, and event coordination. - Assisted in planning, organizing, and coordinating college events. - Contributed to the organization and execution of Looney Toones and other student activities. - Coordinated with team members and participants to ensure smooth event operations.

SRM V-MUN Hospitality & Logistics - Contributed to hospitality and logistics activities during organizational events. - Coordinated with participants and team members to support smooth event execution.

Symrna Fellowship Trust Volunteer - Participated as a volunteer in community-oriented activities. - Worked collaboratively with other volunteers to support organizational activities.

LANGUAGES

English • Malayalam • Tamil

CORE STRENGTHS

- Dedicated and hardworking - Strong interpersonal and communication skills - Team collaboration - Humble and receptive to feedback - Willingness to acknowledge mistakes and improve - Problem-solving and adaptability - Comfortable working across software, AI/ML, and cybersecurity domains

CAREER INTERESTS

Software Development • Backend Development • Full-Stack Development • AI/ML Engineering • Data Science • Cybersecurity • Cloud Engineering • Research & Development
